PRESS RELEASE for Immediate Publication

VOYANTIC LAUNCHES TAGFORMANCE™ PRO – THE ALL-IN-ONE NFC / UHF RFID TEST DEVICE

Voyantic Ltd., the Finland-based global provider of RFID measurement solutions, is launching the new Tagformance Pro measurement device at the 7th China International IOTE 2015 exhibition held in Shenzhen, China on August 20th to 22nd, 2015.

Tagformance Pro raises the Voyantic's widely utilized family of RFID and NFC test equipment to a new level of performance and convenience. By combining UHF RFID and NFC testing into one compact test device, Tagformance Pro is a true all-in-one tool for anyone either developing or using RFID technology. The device is packed with the most extensive protocol support in the IoT universe, and works equally well in testing labels, cards, tagged items, sensor tags, as well as entire RFID systems.

The Tagformance Pro brings unforeseen operational efficiency also for existing Voyantic Tagformance users; the graphical user interface and all measurement data formats are fully compatible within the Tagformance product family. This approach manifests the long-term commitment of Voyantic to continuous development, responsiveness to feature requests, and providing of maintenance services.

Voyantic delivers the Tagformance Pro as a complete turn-key system including software, accessories and anechoic measurement spaces. The Tagformance Pro will be available for customer deliveries at the end of September 2015.

About Voyantic Ltd.

Voyantic is the global leader in performance measurement solutions for RFID. The company provides laboratory measurement systems and production quality testers for RFID tags and readers. The company has delivered globally over 350 testing solutions for RFID manufacturers, system suppliers, RFID users and research organizations.
