Chinese, Spanish, Finnish and German!

已有中文版本!

Jetzt auch auf Deutsch!

Ahora disponible en español!!

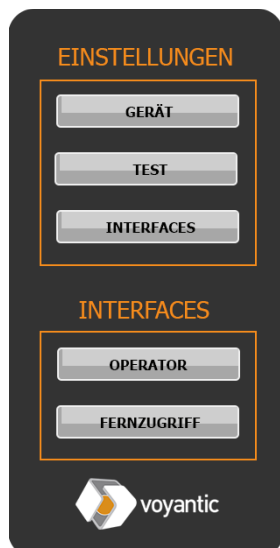

Nyt saatavilla suomeksi!

### Fast EPC Registration and Extended Compatibility

TID and EPC registration with a single command and  
support for mandatory write command.

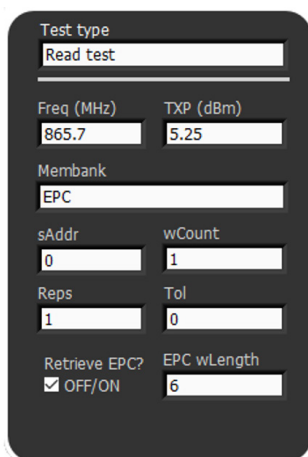

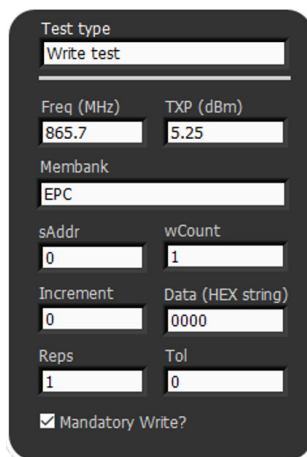

Voyantic

## Localized User Interface

The new Tagsurance 2 GUI provides a localized user interface with translated control panels. Localized user interfaces enable operators to work in their native language, increasing efficiency and reducing uncertainty.

Translated user interfaces will be available in English, Chinese (Simplified Chinese), Spanish, Finnish, and German. Also other translations can be made upon request.

## Fast EPC Registration

Added an option for Read test to register EPC as a part of any read test. This enables efficient collection of more traceability information and increases throughput of processes already requiring reading of EPC.

## New Command Options

Added support for ISO18000-6C mandatory write command in testing and encoding. Enables testing and encoding of tags that do not support BlockWrite command.

## How to Get the Update:

### Maintenance Program Customers:

We will contact you with the new license file, download link and possible training. Feel free to contact [support@voyantic.com](mailto:support@voyantic.com) any time if questions arise!

### Everyone:

Please contact [sales@voyantic.com](mailto:sales@voyantic.com) or your local sales contact for further information.

## General Improvements

- Performance improvements on serial data communication enabling faster operation
- Auto trigger button for testing offline
- Import option of Tagsurance GUI test cases to Tagsurance 2 GUI case builder
- Added new commands for UHF tester serial interface (mandatory write, fast EPC retrieval)
